

Skeldale House ABC Fatso Instructions

The first of the letter is a normal fill letter with an out line

The second letter is a normal applique'

how ever here is neater way to applique avoiding having to cut fabric while in the hoop

sh_applique_method.pdf - Alternative method

you can use the first part of the design on stabilizer for your pattern to cut out. Then restart the design over once stabilizer and fabric have been put in the hoop.

The third Letter you will use the first part of the design for a pattern piece and cut out your fabric.

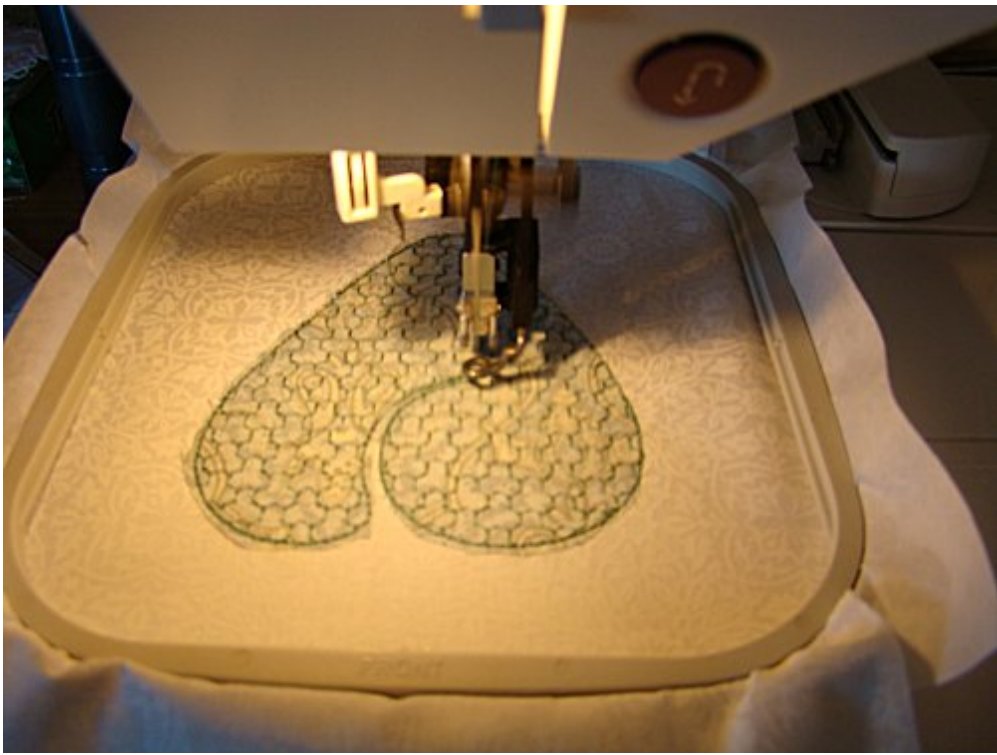

then restart the design once stabilizer and fabric are put in the hoop.

once the outline is done, place the fabric/Mylar on the area securing it, and the motif will sew out on top of it. You can also just use the motif on fabric????

When you come to the normal out line in appliqueing just skip that stage and let the design finish

Voila done
